

Environmental Policy Statement

de Havilland Engineering Group will ensure that its activities are carried out in accordance with best environmental practice as set out by all relevant UK and EC and international regulations and legislation. The Company will develop, demonstrate, promote and monitor use of best practice, techniques and management throughout its activities to eliminate pollution incidents or mitigate their effects through our emergency procedures.

Responsibilities

The Environmental Policy depends on the managers, supervisors and employees at all levels within the Company. The employees will be made aware of what is expected of them by the Company and what is required by them by law.

All employees have a responsibility to accept their personal involvement in the practical application of this policy, but specific responsibility falls upon line managers, supervisors, and staff professionally involved in administration and training.

The Site Supervisors are responsible for the day to day Environmental issues arising on site and for the implementation of all necessary measures to ensure compliance with all statutes and other matters relating to the Environment. They shall identify, during the progress of the works, any matters that breach the Statutes. They are also responsible for any sub-contractors employed by the Company on site, to ensure they comply with environmentally friendly practices.

de Havilland Engineering Group will develop relationships with Suppliers to ensure that they are adhering to best environmental practices, where possible.

Objectives

de Havilland will carry out an assessment of our environmental aspects and impacts and set achievable objectives to reduce our burden on the environment. de Havilland will continually improve our EMS through internal audit, inspections, corrective action and management review.

de Havilland Engineering Group are aware of the requirements of the Wildlife and Countryside Act 1981 and the Protection of Badgers Act, de Havilland will consider animals which are protected, and in particular birds, bats and crested newts.

Access will be given to any specialist environmental consultants and any specialist named by a client.
